Physical Characteristics

Area - 383 acres

Maximum depth - 11 feet

Temperatures:
Surface - 67⁰F
10 feet - 66⁰F

Principal fisheries: Smallmouth bass, chain pickerel, white perch

Tilden Pond is a typical coastal warm water pond, shallow with mud bottom. The pond should continue to be managed for warm water species.

Stocking of cold water sport fish is not recommended at this time due to serve competition with warm water fishes and the lack of cool well-oxygenated water.

Surveyed - August, 1941

Revised - 1953, 1998
